

Alternative Analysis Review Process

Note: Submission should not be the first time the ITS & Network Service Branch has heard of the project or discussed this document. This submission is more of a documentation of previous discussions. If content is not previously shared with the Branch, the review process is likely to take longer and a rejection is more likely.

Notes:
 * Significant impacts would be maintenance costs that the current budget could not accommodate or additional Full Time Employee(s) (FTE) would be needed to maintain that selected alternative.
 **Minor comments/revision can be made to a document so long as the over all meaning of the document is not altered. If comments impact the meaning or the amount of resources needed, then the document will need to go through a resubmittal.
 1. Drafted in June 2021
